

## Service, solutions and support

### Valves

Weir Minerals Services provides specialist services in the refurbishment of safety, isolation and control valves to help you maximise the life span of your critical process equipment - for both Weir valves and other manufacturer brands. Industry experience includes mining, power generation, oil and gas, iron and steel and general industry.

With our extensive local and global expertise in valve design, manufacture and maintenance, Weir Minerals Services has the in-house capability to ensure operating efficiency and safety are never compromised in the servicing, overhaul, recertification and repair of high integrity valves and actuators. Our key drivers are safety, quality, on-time delivery and cost control.

With a strong reputation for delivering complete aftercare solutions that optimise the levels of reliability on critical service, safety, isolation and control valves, our customers are able to benefit from the wide range of valve services that Weir Minerals Services has to offer.

#### Capabilities include:

- routine valve maintenance
- rehabilitation
- valve refurbishment
- on-site machining
- special coatings to extend wearlife and improve efficiency
- maintenance of fluid control equipment
- testing to relevant standard or OEM requirements
- repair, testing and recertification of all models of pressure safety valves with pressure ratings from 150 to 2500 psi (10 to 170 bar) and above
- comprehensive and proactive reporting to monitor valve condition including future recommendations
- supply, overhaul and repair of valves from 10mm to 2400mm nominal bore and in class 50 to 2500 rating.

#### OEM spares and service

We are the original equipment supplier, providing OEM spares and service for:

- Attwood & Morrill
- Batley
- Blakeborough
- Hopkinsons
- Hydrogritter
- Mac Valves
- Sarasin-RSBD
- Tricentric
- Wemco
