

Service, solutions and support

White metal bearings

Weir Minerals Services manufactures and repairs all types of white metal bearings using virgin Hoyt whitemetals manufactured from 99.9% pure based ingredients.

All bearings, whether manufactured or repaired, are subject to 100% ultrasonic bond testing, either to customer specifications or local/ international standards.

Weir Minerals Services can work with bearings ranging in size from 2.5cm up to 3.5 metres in diameter. Systematic procedures and comprehensive work practices deliver the highest quality for new, refurbished and re-engineered white metal bearings.

A fully equipped foundry and machine shop facility, managed by highly experienced people ensures quality results.
