

## Worldwide Service Network

### Rockhampton Service Centre

Weir Minerals Services provides leading edge engineered products and services to diversified industrial markets, supported by a national network of state-of-the-art Service Centres.

The Rockhampton Service Centre provides in-house engineering support, maintenance and service - including overhauls of a range of process equipment - in particular the repair and overhaul of slurry and vertical pumps, valves and hydrocyclones - and field service support.

The Service Centre is located within easy reach of Queensland industries such as mining, sugar and power, and has extensive plant capacity.

The Rockhampton Service Centre is certified to Quality Assurance System ISO 9001:2000, Environmental Management System ISO 14001:2004 and Safety Management System OHSAS 18001: 2008.
