

LINATEX CUT END HOSE (801)

The Linatex Cut End Hose (801) is a readymade hose assembly solution designed to accommodate urgent hose needs and less abrasive slurry applications.

The range of Linatex Cut End Hose (801) is readily stocked in common industry sizes to suit all your hose requirements. The hose coils are designed to be cut to length onsite and fitted with the Linatex Split Cast Coupling System to provide a readymade site assembled flanged hose.

The Linatex Cut End Hose (801) allows re-use of the Linatex Split Cast Couplings as the fittings are not in contact with the process flow. The Linatex Cut End Hose (801) allows the length to be 'cut to fit' to suit the intended duty, ready for in-field assembly. In addition, it allows the re-use of the Linatex Split Cast Couplings as the fittings are not in contact with the process flow.

This adaptable product is an economical solution for quick emergency change out. Our reusable multi-drill pattern coupling system enables operators to minimise inventory costs with the knowledge it is readily available from us for easy replacement.

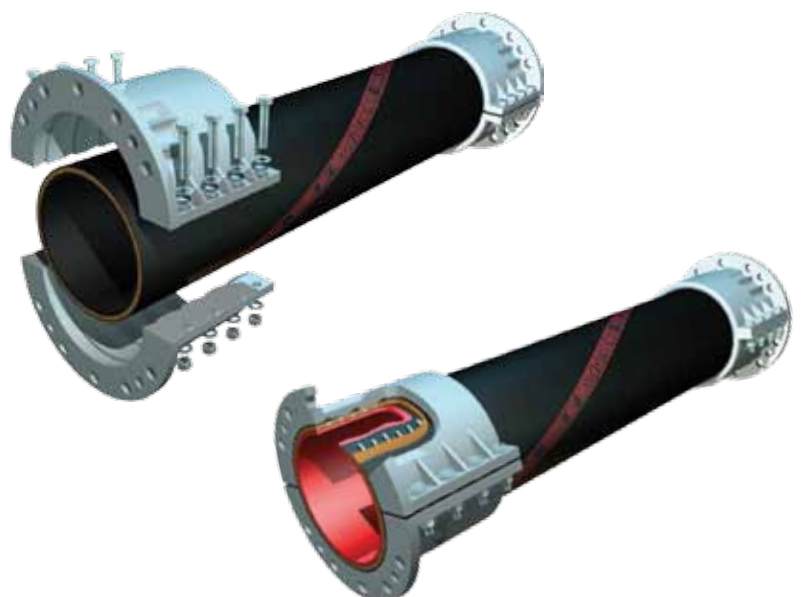

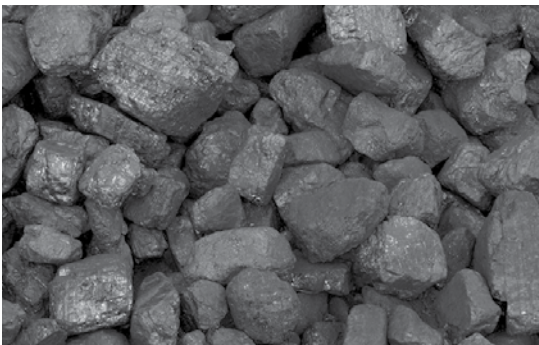

FEATURES

- High tensile reinforcement cord with a steel wire helix.
- An abrasion and UV resistant smooth styrene butadiene compound outer cover.
- Suitable working temperature between -35°C and +75°C (-31°F and +167°F).
- Minimum bend radius of 8-10 times the internal diameter.
- Safety factor is three times the working pressure.
- Available in Linatex Premium Rubber liner or a SBR liner.

APPLICATIONS

The Linatex Cut End Hose (801) is an extremely versatile system and is extensively used across the mining industry including:

- Mineral processing plants
- Sand and gravel industries
- Cement and coal industries
